PLAST 2029: NEW DATES ANNOUNCED

The 21st edition of the international exhibition for the plastics and rubber industries will be held from 15 to 18 May 2029 at Fiera Milano, Rho

Milan, 8 October 2026 – Promaplast has announced the dates of the next edition of Plast, Europe's leading trade fair of the year for the plastics and rubber industries. The 21st edition will take place from **15 to 18 May 2029** at the Fiera Milano exhibition centre in Rho.

Its return to a spring slot in the international exhibition calendar will give exhibitors and visitors an ideal moment to plan investments and showcase the sector's latest technological innovations, from processing machinery to next-generation raw materials.

Building on the success of Plast 2026

Plast 2029 builds on the legacy of an edition that exceeded cautious pre-show forecasts, against a geopolitical and macroeconomic backdrop marked by considerable uncertainty. Plast 2026 recorded 35,000 attendances, with foreign visitors from 110 countries accounting for 25% of the total, and more than 1,000 exhibitors, 44% of them international, across 40,000 square metres of exhibition space. Over 350 selected foreign delegates took part in the incoming programme organised with Agenzia ICE – Italian Trade & Investment Agency, while the conference programme was fully booked on several occasions.

“By announcing the dates of Plast 2029 now, we want to give exhibitors and visitors a clear horizon on which to build their participation. The return to May is a sign of continuity that the market has been asking for, and we are already working to make the next edition even richer in content, more international and closer to the needs of businesses”, says **Mario Maggiani**, Managing Director of Promaplast.

“For European plastics and rubber machinery manufacturers, Plast is a strategic showcase for the markets of the Mediterranean, the Middle East and Eastern Europe”, says **Tobias Baur**, President of Euromap, the European association of plastics and rubber machinery manufacturers. “At a time of profound transformation for the sector, amid the circular transition and global competition, exhibitions such as Plast are essential for asserting the technological leadership of European industry”.

The new features of Plast 2029 will be unveiled shortly, from the opening of exhibitor registrations to the satellite shows, and from innovation initiatives to internationalisation projects. All updates will be published on plastonline.org and on the exhibition's official social media channels.

Plast

Plast 2029 is Europe's leading trade fair of the year for the plastics and rubber industries, taking place from 15 to 18 May 2029 at Fiera Milano, Rho. Organised by Promaplast, the exhibition is the benchmark platform for presenting plastics and rubber processing machinery and next-generation raw materials for the production of semi-finished and finished products, as well as a unique opportunity to forge new business relationships.
